

INTRODUCING TABE EDGE

*TAFE Edge
supports learners
with targeted
exercises and
practice on any
digital device.*

Data Recognition Corporation (DRC) and Aztec Software have partnered to deliver TAFE Edge—the only targeted practice solution built in direct partnership with the creators of TAFE. Aligned to TAFE 13&14 blueprints and delivered inside the Aztec Learning System, TAFE Edge helps programs close skill gaps, improve scores, and achieve measurable gains faster.

Targeted Practice That Drives Measurable Gains

TAFE Edge delivers standards-aligned, skill-level practice so learners focus on exactly what they need to improve—with no time spent on skills they've already mastered.

- Thousands of targeted practice items that mirror the official TAFE 13&14 assessments across all levels of Reading, Math, and Language
- Designed to help learners build confidence, practice skills, and improve their TAFE test results
- Skill-level alignment to the TAFE Individual Profile Report
- Immediate feedback and remediation to reinforce learning
- Directly supports Measurable Skill Gains (MSG)

With TAFE Edge, programs can target the right skills at the right level for faster results.
